UTC Fire & Security
A United Technologies Company

Standalone Downloader for Advisor Advanced - Configuration Software (Volume 1: European Multilingual CD-ROM edition).

ATS8500

ATS8500 Programming tool

ATS8500 provides a simple, open look Windows® interface that simplifies the programming of all the AdvisorAdvanced options stored in an SQL database.

A PC running ATS8500 can be connected to a control panel either remotely via the built-in PSTN dialer and ethernet/GPRS connection or locally via USB.
ATS8500 is capable of up and downloading the entire database of the panel at once or synchronize the changes made.

A powerful report printing facility produces detailed programming sheets for all system information contained within the ATS8500 database. This feature enables quick reference for trouble shooting, expansion, programming and client administration.
It also features a range of flexible history reports.

Volume 1 Supported languages: Danish, Norwegian, Finnish, Swedish, French, Turkish, Polish, Slowakian, Tschech, Dutch, English Irish, English UK, French, German, Italian, Portugal and Spanish

Specifications
